

The Federal Communications Commission

Dear The Federal Communications Commission,

I see the FCC as a group that is AGAINST the American people, merely a pathetic waste of taxpayer money that should be abolished for good, and completely eliminated!

1) The FCC should be in place to stop cold calls, and in recent years, even though I've added my numbers to a do-not-call list, I've been getting MORE cold calls instead of LESS, even automated calls from moron politicians around voting time! If the FCC was really for the American people, they would truly change and fully enforce the laws to prevent ALL cold calls!

2) The FCC keeps raising everyone's phone bills, adding and increasing miscellaneous charges every month for their own or the government's financial gain, and giving us NOTHING more in return! If anything, the FCC should start decreasing phone charges in all areas, because the quality of telephone, cell phone and dialup internet communications has only gotten WORSE instead of better in recent years!

3) The FCC should change regulations on TV commercials. Commercials are compressed and amplified to produce nearly double the decibal level of standard programming, making them even more annoying than they used to be. Commercials should be regulated to be the same or LESS volume than the programs we wish to watch. Screaming commercials annoy more than produce results!

4) The FCC has made no attempt on making any validity standards for so-called "info-mercials" and regular commercials. Anyone can sell anything they want, even if it's a scam or a pyramid scheme, and thousands of people get suckered in by these fake companies every year for their junk products, weight-loss, hair growth, and other worthless services that are fake! Regulations should be imposed based on whether or not these companies have complaints against them in the Better Business Bureau, to protect the American public!

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Arthur Dellea
